DISARMAMENT

On the subject of disarmament the action quoted below was taken recently by the Executive Committee of the California State Church Federation. It was ordered that a copy be forwarded to the President, the President of the Senate, the Secretary of State and to the Senators and Representatives in Congress from California. This has been done:

"Whereas, the burden of taxation for the construction and maintenance of great armaments crushes the very people for whose protection they are maintained; and

"Whereas, it has been clearly demonstrated that such armaments are not conducive to peace, but much more inclined to foment and provoke war;

"Therefore, resolved: That we believe it to be the duty of America to propose and, with proper safeguards, to enter into agreements with the other great powers of the world providing for a concerted reduction of armaments, such reduction to proceed until only so much equipment shall remain as is required for national and international police protection.

"Resolved: That we approve the proposal made by the Senate of the United States that the President call a conference of representatives of Great Britain, Japan and the United States to consider the beginning of a program of reduction of armaments, and that we earnestly urge the House of Representatives to concur in this action."
